

System Requirements

The following are the minimum requirements to install and run PDF Converter Professional 5.0

- A computer with a Intel® Pentium® or higher processor
- Supported operating systems
 - Windows 2000 Service Pack 4 (limited support)
 - Windows XP 32-bit Edition with Service Pack 2
 - Windows XP 64-bit Edition
 - Windows Vista 32-bit or 64-bit Editions
 - Windows 2003 Server

(Note: The support for Windows 98, Windows ME is discontinued)
- Microsoft Internet Explorer 5.5 or above
- 256MB of memory (RAM), 512MB recommended
- 200MB of free hard disk space for application files plus 50MB working space during installation
- SVGA monitor with 256 colors, but preferably 16-bit color (called High Color in Windows 2000 and Medium Color in XP) and 800 x 600 pixel resolution
- Sound card is optionally required for using the functionality of the supplied Text-To-Speech Engine
- Windows-compatible pointing device
- CD-ROM drive for installation
- Web access needed for product registration, activation and obtaining live updates for the program.
- To save DOCX, XLSX and PPTX files (for Microsoft Office 2007 Word, Excel and PowerPoint) you should have or install Microsoft .NET Framework 3.0. The Microsoft .NET Framework 3.0 is part of the Windows Vista operating system and does not need to be installed there. The Microsoft .NET Framework 3.0 can be installed on Windows XP but cannot be installed on Windows 2000.

General Notes

- Conversions of XPS documents into editable formats and PDF-XPS do not require having any additional component installed on the computer.
- Performance and speed will be enhanced if your computer's processor, memory, and available disk space exceed minimum requirements. This is especially true when converting very large color PDF files. Hyper-thread enabled or multi-processor systems can deliver better performance.
- Conversion to different editable formats can be performed whether or not the target applications are installed on your system. However, to use the results, you need the applications associated to the target file types you want to use (for example Microsoft Word 97, Microsoft Word 2000 (SP3), Microsoft Word XP (SP3), Microsoft Word 2003 (SP1) for .doc files, the same versions of Microsoft Excel for .xls files, Microsoft Office 2007 (SP1) for DOCX, XLSX and PPTX files and Corel WordPerfect 9 (SP3), 10 (SP5), 11 (SP2), 12 (SP1), and WordPerfect X3 for .wpd files). If the Microsoft Office Compatibility Pack for an earlier Office product is installed on your computer, the Office 2007 output files can be opened in an earlier Office version.
- The Enterprise Edition is delivered with support of LexisNexis® CaseMap® 7.0.

Document Management System support in the Enterprise Edition

- Hummingbird Enterprise™ 2004 and 2005

PDF Converter supports Hummingbird Enterprise systems if a DM Extensions API is installed and configured on the client machine. The product is also integrated into Windows Explorer DM Extension.

- Interwoven® WorkSite 7.5.1 and 8.2

PDF Converter supports Interwoven WorkSite systems if DeskSite 6.6 for WorkSite 7.5.1 or DeskSite 8.2 for WorkSite 8.2 is installed and configured on the client machine. The product is also integrated into DeskSite clients. (**Note:** Using DeskSite 8.2 under Windows Vista operating systems is highly recommended.)

- Hummingbird® DOCSOpen® 4.0

Refer to the DOCSOpen installation guide to perform the client installation. When this is done, the program will be able to connect to the server.

- Livelink® ECM - Enterprise Server 9.7.0. from OpenText Corp.

PDF Converter supports LiveLink ECM if LiveLink Explorer Professional Windows Client is installed and configured on the client machine.

Note

Performance and speed will be enhanced if your computer's processor, memory, and available disk space exceed minimum requirements. This is especially true when converting very large color PDF files.
