

About the PDF Converter Assistant

The PDF Converter Assistant gives you control over the conversion process.

The Converter Assistant serves for

- opening source files (PDF/XPS) to be converted
- showing a preview
- specifying the page range
- defining the processing mode (Standard, Legal, Spreadsheet and Form)
- specifying the processing options
- defining the output format

Word, PowerPoint, WordPerfect or RTF for standard documents, Word, WordPerfect or RTF for legal documents, Word or RTF for forms and Excel for spreadsheets

- specifying the output options
- starting conversion
- viewing source and result files
